DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, 13-22, 25-34, 37, and 40, drawn to indicating availability of on-demand broadcast content, classified in class 455, subclass 3.01.
 - II. Claims 11, 23, 35, 38, and 41, drawn to establishing a next wakeup time in order to minimize a total time of receiving a call-paging message, classified in class 455, subclass 574.
 - III. Claims 12, 24, 36, 39, and 42, drawn to evaluating signal metrics, classified in class 455, subclass 67.11.
 - IV. Claims 43-53, drawn to transmitting a broadcast paging message multiple times within each digital radio frame, classified in class 370, subclass 328.

The inventions are distinct, each from the other because of the following reasons:

The four groupings have separate utility.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
